

Assignment -1

Python Programming

Assignment Date	28 October 2022
Student Name	Ms. Bhavani Sree SK
Student Roll Number	412419205016
Maximum Marks	2 Marks

Question-1:

Write a program which will find all such numbers which are divisible by 7 but are not a multiple of 5, between 2000 and 3200 (both included). The numbers obtained should be printed in a comma-separated sequence on a single line.

```
1 bh=[]
2 for i in range(2000, 3201):
3     if (i%7==0) and (i%5!=0):
4         bh.append(str(i))
5 print(','.join(bh))
```

Python console output:

```
In [1]: runfile('C:/Users/kmrug/.spyder-py3/temp.py', wdir='C:/Users/kmrug/.spyder-py3')

In [3]:
```

Question-2:

With a given integral number n, write a program to generate a dictionary that contains (i, i*i) such that is an integral number between 1 and n (both included). and then the program should print the dictionary.

Suppose the following input is supplied to the program:

8

Then, the output should be:

{1: 1, 2: 4, 3: 9, 4: 16, 5: 25, 6: 36, 7: 49, 8: 64}
